and fields, and **predict** future
trends

Creation of advanced reports

BOOSTEDx Technologies

BOOSTEDx uses the most cutting-edge technologies.

AWS Glue
AWS S3 Bucket
AWS Lambda Functions

Android/iOS Mobile App
Web App

BOOSTEDx Why?

01

More than TEDx

TEDx does not offer search for hot topics and speakers.

BOOSTEDx offers **empowered search and analysis**.

02

High Integrability

Integrate TEDx data with **other sources**, even with **your own data**.

03

Scalable and Cloud-Based

Serverless low-cost architecture
Unlimited data support
High availability

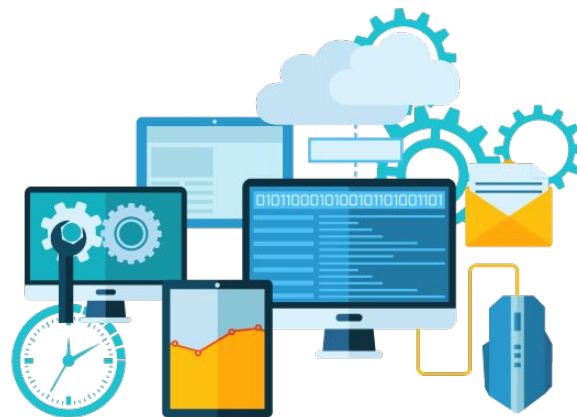

BOOSTEDx Critical points

Number of users

The accuracy and value of results based on the user's data depends on the number of app users. It is critical to find a large-enough community.

Customization

Higher the number of enterprises, higher the amount of customizations requested. The focus should be on developing re-usable queries and analysis.

BOOSTEDx

More than TEDx
